Who may participate in the MSDN-AA program at Chippewa Valley Technical College?

Students who are currently enrolled in at least one course in either the Information Technology – Network Specialist (IT-NS) or the Information Technology – Programmer Analyst (IT-PA) departments may install the software on their personal computers. Students who have a registered major in one of the eligible departments but are not currently enrolled in courses that lead to credit or a certificate are not eligible to obtain MSDN-AA software for their personal computers. Upon graduation students will no longer be eligible to receive MSDN-AA software until and unless they enroll in additional program courses. However students may continue to use previously acquired MSDN-AA software after they have graduated or are no longer enrolled in approved courses in accordance with the EULA.. The MSDN-AA software DOES NOT need to be removed or returned.

How may MSDN-AA software be used?

The tools and technologies provided through the MSDN-AA subscription may be used exclusively for academic instruction, academic projects, and non-commercial research only. The software that is part of the MSDN-AA program may not be used for any IT infrastructure or administration purposes at the member’s school, university, foundation, or organization.

All users of software provided through Developer AA are prohibited from using MSDN-AA software for commercial purposes. You CANNOT legally take the software with you to work! If you use any of the tools and technologies provided through the MSDN-AA program to develop any product that you wish to distribute to others, by any means, at any (or no) cost, under any license agreement, you MUST initially purchase all appropriate commercial licenses of any and all products used during the product’s creation.

Every copy of the software must be a true and complete copy and it must include all copyright and trademark notices. All software made available must include all of the files on the media.

The software provided by MSDN-AA may not be sold, rented, leased, or transferred to any third party including contractors, consultants, other companies, and other department personnel. DO NOT give copies of software you have obtained through MSDN-AA to your friends, family, or ANYONE else – even if they would otherwise be entitled to it. Everyone MUST go through the process of requesting software in their own name – using a valid and current MSDN-AA account.
